3PTP[®] PADLOCK KEY SYSTEMS

KEYED DIFFERENT (KD)

Each Keyed Different padlock operates with a unique key ensuring the highest security for the end user.

This means all locks are **uniquely keyed**, a key of one lock will not fit any other lock in the same or different color groups.

Locks have to be destroyed if keys are lost or misplaced.

Each color group in the 3PTP[®] range has up to 5000 unique Key Different combinations.

3PTP[®] padlocks in Keyed Different system come with 2 Unique keys with each padlock.

KEYED ALIKE (KA)

Keyed Alike padlocks operate with a common key, one key opens all locks in the same number group.

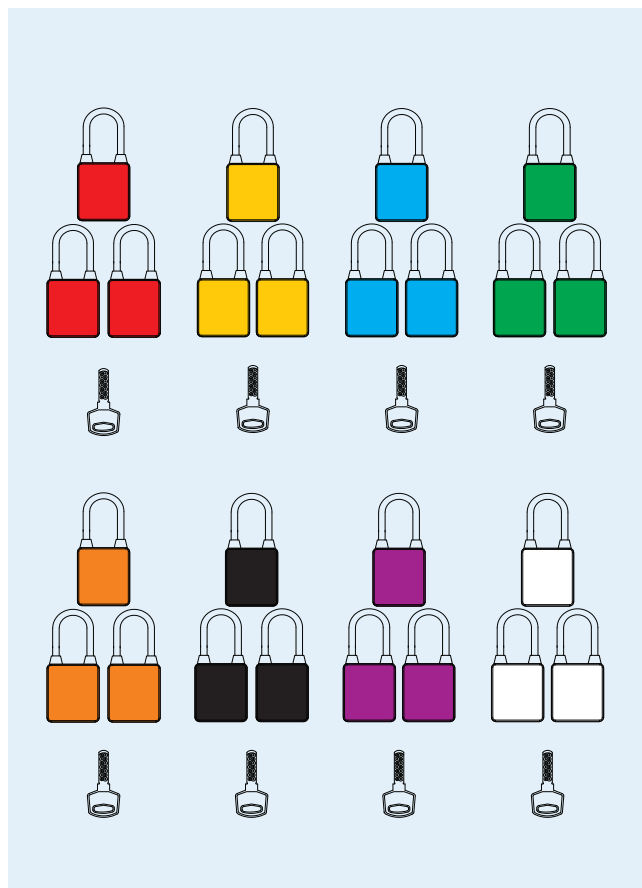

Ideal for situations where one employee is authorized for locking out different energy sources during LO/TO operations. One Key opens all locks reducing downtime on maintaining records of different keys.

However "same key" convenience could pose problems if keys can be accessed by other employees as it could compromise individual security.

KA padlocks can be customized per group **OR** color. Groups start from 2 or more padlocks to several hundreds, each KA group operates with a Different Keyed Alike Key.

Specify number of Groups and quantity of locks per group when ordering.

3PTP[®] padlocks in Keyed Alike system come with 1 Key Alike with each padlock.

KEYED DIFFERENT & MASTER KEYED (KD&MK)

Each lock in a KD+MK system is Uniquely Keyed and also has an override Master Key which opens all locks in a particular color group irrespective of the shackle type or length.

This permits organizing master key systems along departmental or other functional lines to allow supervisory or emergency access.

Master Keys are coded per color, making it easier to order spare MK's at a later stage by stating the color of the lock.

Groups of locks with separate Master Keys cannot be generated in the 3PTP® system.

All 3PTP® padlocks in Keyed Different + Master Keyed system come with 2 Unique Keys per padlock as standard.

Master Keys are available in 1 or multiples and ordered separately.

KEYED ALIKE & MASTER KEYED (KA&MK)

Each group of lock in KA+MK system opens with a separate keyed Alike key in the same color range.

A Master key opens all groups of differently keyed Alike locks in the same color.

All 3PTP® padlocks in keyed Alike + Master keyed system come with 1 Key Alike per padlock as standard.

Master Keys are available in 1 or multiples and are ordered separately.

3PTP[®] PADLOCK SELECTION GUIDE
